

Job Description: Angular/AngularJS Engineer

We are looking for an experienced Angular/AngularJS Engineer with a strong proficiency in Angular to join our dynamic development team. As an Angular/AngularJS Engineer, you will be responsible for developing and maintaining the frontend webview using Angular.js for our famous multiplayer real-time strategy (RTS) game that serves a global audience. You will collaborate with client and server developers, game designers, and other stakeholders to deliver high-quality and visually appealing gaming experiences.

Responsibilities: [🔗](#)

- Develop and maintain the frontend webview of the game using Angular and Angular.js, ensuring seamless integration with the hybrid architecture that incorporates our home-grown game engine.
- Design and implement interactive and visually appealing user interfaces, incorporating art and game design elements within the webview.
- Collaborate with other developers to establish seamless communication between the webview and the server-side logic.
- Identify and resolve technical issues, bugs, and bottlenecks in the webview codebase to ensure a smooth and immersive gaming experience.
- Write clean, maintainable, and reusable code following industry best practices and coding standards for Angular and Angular.js.
- Conduct code reviews to maintain code quality, readability, and adherence to established guidelines.
- Collaborate with cross-functional teams, including game designers, to gather requirements, define project scope, and estimate timelines.
- Perform unit testing and debugging to ensure software functionality and reliability within a hybrid gaming environment.
- Contribute to the deployment and maintenance of applications in production environments that cater to a large user base.
- Continuously improve development processes and methodologies to enhance the gaming experience for players worldwide.

Requirements: [🔗](#)

- Bachelor's degree in Computer Science, Software Engineering, or a related field. Equivalent practical experience will also be considered.
- Proven working experience as an Angular/AngularJS Engineer or in a similar role, with expertise in Angular.js.
- Strong proficiency in Angular/Angular.js and its core principles and features.
- Experience in frontend technologies such as HTML, CSS, and JavaScript.
- Familiarity with RESTful API integration and data exchange between the webview and game engine components.
- Familiarity with version control systems (e.g., Git) and agile development methodologies.
- Python
- Excellent problem-solving skills and attention to detail.
- Strong communication and collaboration skills.
- Ability to work effectively in a fast-paced, team-oriented environment.

Preferred skills: [🔗](#)

- Experience with Python and Google App Engine (GAE) for backend development.
- Understanding of server-side logic, API development, and data management using Python.
- Knowledge of deploying applications in production environments.

Join our team of talented Angular/AngularJS Engineers and contribute to the development of the frontend components for our famous multiplayer RTS game. If you are passionate about Angular.js and thrive in a collaborative environment with a global impact, we would love to hear from you. Apply now to join our team and help create captivating gaming experiences for players worldwide.
